Brainstorm & Idea Prioritization Template:

Brainstorm & Idea Template

The project “**Auto Ticket Classification using Flow Designer**” focuses on automating the ticket management process in ServiceNow. During brainstorming, the team identified ideas such as **automatic ticket classification, category selection, priority identification, assignment group selection, ticket routing, notifications to the responsible team, automatic status updates, and reduction of manual work**. Based on these ideas, the proposed solution is to use **ServiceNow Flow Designer** to automatically process incoming tickets, classify them according to their details, select the appropriate category and priority, assign them to the correct assignment group, and route them to the responsible team. Notifications and status updates can also be automated. This helps **reduce manual effort, save time, improve ticket accuracy, and make the overall ticket-handling process more efficient**.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Auto Ticket Classification using Flow Designer

Use this template to plan and visualize how we will automate ticket classification, categorization, assignment and routing in ServiceNow using Flow Designer to improve efficiency and reduce manual work.

- 🕒 30 minutes to prepare
- 👤 1 hour to collaborate
- 👥 3–6 people recommended

1 Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

-  **Team gathering**
Invite the right people to the session and send an invite.
-  **Gather input**
Collect current ticket handling challenges, ideas and expectations from the team.
-  **Set the goal**
Define what success looks like for automated ticket handling.
-  **Learn how to use the Flow Designer tools**
Use the Canvas and components to build and test flows.

2 Define your problem statement

What problem are we trying to solve?
Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

EXAMPLE

How might we automate ticket handling to reduce manual work and improve ticket accuracy?

Key rules of brainstorming

To run an effective and productive session

-  Stay on topic.
-  Encourage wild ideas.
-  Defer judgment.
-  Listen to others.
-  Go for volume.
-  If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization
