

Ideation Phase

Define the Problem Statements

Date	30 September 2026
Team ID	SWTID-2026-3807
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

The school IT helpdesk receives multiple incident requests daily from students and teachers, such as Wi-Fi issues, projector failures, password problems, and slow computers. Currently, IT staff manually reviews each request and assigns a category, which is time-consuming and inefficient.

This project automates ticket classification using ServiceNow Flow Designer by analyzing keywords in the incident's short description and description fields.

Auto Ticket Classification Problem Statement

I am	I'm trying to	But	Because	Which makes me feel
an IT support agent	classify and prioritize tickets quickly	manual classification is slow and error-prone	ticket descriptions are inconsistent and depend on individual judgment	Frustrated and worried that urgent issues may be delayed

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An IT support agent	Classify and prioritize tickets quickly	Manual classification is slow and error-prone	Ticket descriptions are inconsistent and depend on individual judgment	Frustrated and worried that urgent issues may be delayed
PS-2	A service desk manager	Ensure tickets are routed to the right teams without delay	Misclassified tickets cause bottlenecks and increase resolution time	Manual processes lack standardization and scalability	Concerned about customer satisfaction and team efficiency
