

Project Design Phase
Proposed Solution Template

Date	30 September 2026
Team ID	SWTID-2026-3807
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Manual ticket classification is slow, inconsistent, and error-prone, leading to delays in resolution and reduced customer satisfaction.
2	Idea / Solution Description	Implement Auto Ticket Classification using Flow Designer, leveraging AI and automation to categorize tickets based on content and context, and route them to the right teams seamlessly.
3	Novelty / Uniqueness	Unlike basic rule-based scripts, this solution uses intelligent automation integrated with ITSM systems, reducing human dependency and improving accuracy.
4	Social Impact / Customer Satisfaction	Faster ticket resolution improves customer experience, reduces frustration for IT staff, and enhances trust in support services.
5	Business Model (Revenue Model)	Can be offered as a subscription-based service or integrated into existing ITSM platforms, generating recurring revenue through licensing and support.
6	Scalability of the Solution	Highly scalable across organizations of different sizes; adaptable to increasing ticket volumes and customizable for diverse IT environments.
