

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	SWTID-2026-3807
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Ticket Creation & Management	Create Customer Ticket Enter Ticket Description Select Ticket Category Generate Unique Ticket Number
FR-4	Customer Journey Tracking	Track Ticket Status Track Journey Stage Assign Ticket to Support Team Update Ticket Progress Close Ticket after Resolution

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should provide a simple, clear and user-friendly interface for customers and support staff.
NFR-2	Security	The system should provide secure user authentication and role-based access to protect customer and ticket information.
NFR-3	Reliability	The system should reliably store and retrieve customer, ticket and journey information without data loss.
NFR-4	Performance	The system should create, update and retrieve tickets and journey information within a reasonable response time.
NFR-5	Availability	The system should be available whenever customers and support staff need to access or manage tickets.
NFR-6	Scalability	The system should support an increasing number of customers, tickets and customer journey records without major performance issues.
